

Amieira do Tejo - Alamal (Belver) Canoeing - Tejo River I

From **22,5€**

Description

Activity performed in Tejo, the longest Iberian river. 15km between the dam of Fratel (downstream) and the river beach of Alamal, next to Belver Castle. It is quite a pleasant activity, the sector is very wide, with no obstacles, and therefore very accessible in terms of canoeing. If by chance, the dam of Fratel releases some water (controlled discharges), the activity becomes a bit faster. The surroundings are magnificent, with cliffs on the banks and have as its highlight the arrival at the river beach of Alamal, with the Belver Medieval Castle as a backdrop. Halfway down there's a stop on the riverbank to have a snack, which participants must bring from home to the activity.

Recommendations

During winter or in periods of high precipitation, river flow may vary rapidly in a few hours, so the activity is always dependent on the analysis and evaluation of the river at the exact time, also taking into account the participants' experience and their age group. Trans Serrano may have to cancel the activity immediately before it starts. During autumn and winter, we do not recommend the participation of children and young people under the age of 16. Participants wearing glasses must pay special attention to them. Make sure to bring a glasses' cord to avoid getting them lost in the river. We do not recommend the use of mobile phones, cameras and other electronic devices along the activity. Also, during the activity, there should be nothing visible inside the cars. And everything considered of value should be placed in a backpack (which will always be with the participants or with the organization).
